This brief guide is intended to provide health information. It does not imply recommendation of any treatment and should not be substituted for the advice of a health care provider.

To support the provision of health information at Trillium Health Centre, we have developed "HealthFinders" on a variety of health topics. These serve as starting points on your quest for health information, and represent just a selection of our resources. HealthFinders are also available through our web site at <http://www.trilliumhealthcentre.org/health>

Allergies

INTERNET SITES

Anaphylaxis Canada

<http://www.anaphylaxis.ca>

This organization provides support and advocacy for individuals and families living with life-threatening allergies. General information about severe reactions is provided, along with a list of the most common allergens. Also featured is a helpful frequently asked questions section, and a list of support groups across Canada.

Allergy Asthma Information Association

<http://www.aaia.ca>

The AAIA is a registered Canadian charity dedicated to helping individuals and their families cope with everything from hay fever to life-threatening food allergies and asthma. The site provides access to many informative articles on the topic, and makes available its products, which range from educational posters to EpiPen carriers and cookbooks.

American Academy of Allergy, Asthma & Immunology

<http://www.aaaai.org>

This is the website of the major U.S. professional medical specialty organization dealing with allergy, asthma and related conditions. Click on the 'Patients and Consumers' tab on the homepage to access extensive information about all types of allergies.

The Food Allergy & Anaphylaxis Network

<http://www.foodallergy.org>

FAAN is a U.S. based international organization which aims to raise awareness of food allergy and anaphylaxis and the issues surrounding these conditions. The site provides useful information on each of the most common food allergens.

BOOKS

What To Do About Allergies A special report from Harvard Medical School. Boston, MA: Harvard Health Publications, 2007

This report delivers practical advice and current research findings in clear, easy-to-understand language. It explains how and why an allergic reaction happens, discusses treatment options, and offers advice on avoiding triggers which may precipitate a full blown allergic attack.
