
A TEAM EFFORT

Thank you to our partners

Throughout the entire redevelopment project, Trillium has had a great amount of support from numerous partners who helped to make each project a success. In acknowledgement of these partners, we thank each and every one of them for their dedication and hard work in support of our projects.

From the early stages of development to the final stages of building and maintaining our newest facilities, each partner has played a significant role in the success of each project.

Ministry of Health and Long Term Care and Infrastructure Ontario

The Ministry of Health and Long-Term Care and Infrastructure Ontario worked with Trillium Health Centre to redevelop the hospital. Infrastructure Ontario is a Crown corporation dedicated to managing some of the Province's larger and more complex infrastructure renewal projects – ensuring they are built on time and on budget.

Trillium's project is guided by principles outlined in the Province's *Building a Better Tomorrow* framework, which ensures public ownership of core assets such as hospitals, schools, and water and wastewater facilities. The Trillium Health Centre project is one of many infrastructure projects being upgraded and modernized under *ReNew Ontario*, the government's five-year, \$30-billion plus public infrastructure investment plan.

EllisDon – Building Team

A request for qualifications (RFQ) for Trillium's redevelopment was issued in March 2006. From a short list of qualified companies, Trillium selected EllisDon Corporation to build and finance the hospital's largest redevelopment project in March 2007.

EllisDon has over 50 years of experience in the construction field and has headed countless successful projects in Canada and around the world.

Susan Black, MRAIC, OAA, AOCA – Principal and Director, Perkins Eastman Black Architects

Perkins Eastman Black

Since 1996, Susan Black has worked closely with Trillium Health Centre in transforming both the Mississauga and West Toronto locations into a new kind of health care experience. Susan loaned her expertise to the design of the new inpatient wing by blending the latest in clinical and technological efficiencies with sensitive, non-institutional interior design.

The Perkins Eastman organization is a global practice specializing in architecture, planning, and interior design.

Trillium Health Centre Foundation

Part of any capital project is raising money, and the Trillium Health Centre Foundation did so superbly. Led by the Capital Campaign Cabinet, the Leadership Gifts Committee and the President's Circle donors, the Foundation raised \$36 million towards Trillium's redevelopment program. More than 22,000 donors stepped forward and helped to make Trillium's redevelopment dreams a reality.

Health Care Relocations (HCR)

Health Care Relocations (HCR) has over 30 years of experience as a leader in health care moves across North America. They have been working closely with Trillium over the past several months to develop detailed move plans, schedules and role assignments. They have set the appropriate resources in place and will be onsite to manage the physical move of patients and equipment on move day. HCR is committed to working diligently with Trillium staff to ensure a safe and successful move into the new wing.
